Hiring Manager,
Uplight
Pune, Maharashtra

Subject: Application for Implementation Specialist Position

Dear Hiring Manager,

I am writing to express my strong interest in the Implementation Specialist position at Uplight. As a recent B.Tech Computer Science graduate with hands-on experience in SQL, API testing, troubleshooting, SaaS workflows, and quality assurance activities, I am excited about the opportunity to contribute to Uplight's mission of building a cleaner and smarter energy future.

Through my internship experience at Eloelo and Salesforce Developer Virtual Internship program, I gained practical exposure to workflow validation, defect tracking, debugging, API testing, technical documentation, and cross-functional collaboration within Agile environments. I have worked with tools and technologies including SQL, MySQL, Jira, Postman, REST APIs, Git, and MS Excel while supporting testing and issue analysis activities.

I am particularly drawn to this role because it combines technical problem-solving, implementation support, communication, and collaboration with global teams. My academic projects, including a Hotel Reservation System using Java and MySQL, strengthened my understanding of database operations, SQL queries, backend workflows, and troubleshooting processes.

I am highly adaptable, eager to learn new technologies and processes, and comfortable working in dynamic environments that require strong ownership and teamwork. I am confident that my technical foundation, communication skills, and willingness to learn would allow me to contribute effectively to Uplight's delivery team.

I would welcome the opportunity to discuss how my background and enthusiasm align with the requirements of the Implementation Specialist role. Thank you for your time and consideration. I look forward to hearing from you.

Sincerely,

Enanka Nandi
